

# Animals of Canada

Print one game board on card paper. Print one copy of the maple leaf collecting board and one set of animals per child. Laminating will ensure durability. You will need pawns and a die to play this game. Children place their pawns on START. Using the die, they move around the board collecting the picture cards as they land on them. One picture card per player is collected - if they land on a picture that they already have, they do not collect a second card. First player to collect all 5 picture cards wins the game.
