

## Thermometer Reading Sorting Game

Print the sorting board and laminate. Print the thermometers and cut out; covering with contact paper will ensure durability. Have the children read the temperatures on the thermometer (good time to work on counting by 5's with older children!) and sort the thermometers to the correct season. Younger children can use the picture clues on the thermometer to sort to the correct season.

Notice that I created thermometers in both Fahrenheit and Celcius... don't want anyone to waste valuable ink printing the wrong one!
