

Word Family Go Fish

Print the cards on card paper. Laminating will ensure durability. Place the cards in a pile or spread them out face down. Children choose 5 cards to begin the game and ask each other for cards belonging to word families in their hand. ie... Do you have any 'ock' words? The other player must give them all the cards they have in that word family. Then the player goes again. If they have none, they 'go fish' and play passes to the next person. If they pick up a card from the word family they asked for, they say 'picked one up' and go again until they 'go fish' and do not pick up a card in the set. When all 4 cards in a word family are collected, the player puts them down face up. Game ends when all matches have been collected. Person with the most word family sets wins.

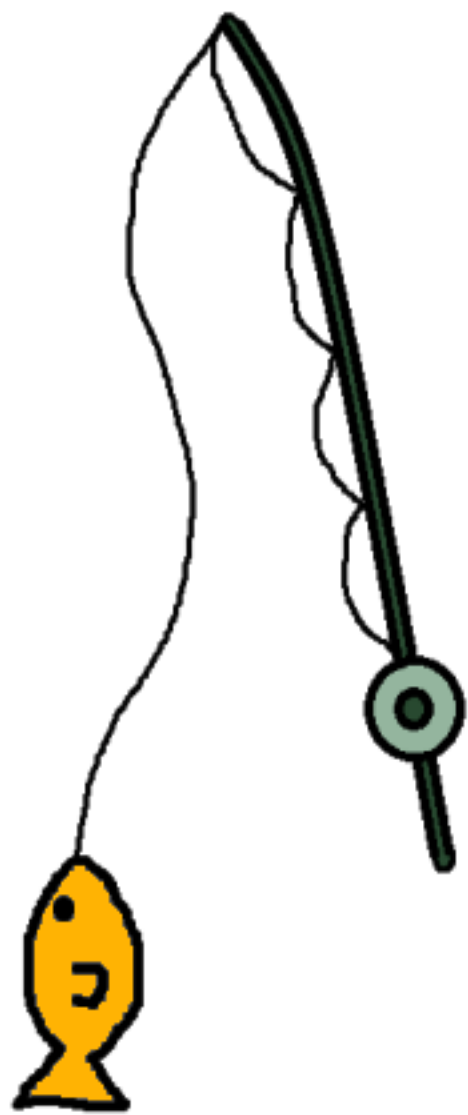

Alternate play... do not have the player go again - play simply passes to the next person after a card is asked for or picked up.
